300 litre pump pit

HALGAN PTY LTD

300 LITRES PUMP STATION

The Halgan 300 litre pump station is designed to collect and pump wastewater such as raw sewerage, trade waste, industrial effluent, seepage and storm water in situations where a gravity fall is unavailable. The Halgan 300 litre pump station is ideal solution for industrial, commercial and government projects where installation costs and on-site convenience are major considerations.

APPLICATIONS

The Halgan 300 litre pump station is used in low flow rate applications. Usually two to five fixtures are connected to the Halgan 300 litre pump station.

- * schools
- * caravan park
- * takeaways
- * restaurants
- * resorts
- * industrial plants
- * butcher shops
- * boat sheds

FEATURES

The main features the Halgan 300 litre pump station offers are in the site cost and time savings when compared to the conventional insitu type stations.

Other features are:

- * Simplified planning
- * factory assembled before dispatch
- * complete packaged delivered to site
- * simple backfill: 5 to 1 sand/cement backfill
- * optional extra alarms
- * reduced design work
- * easily transported
- * light weight
- * space saving
- * range of pumps available

MAINTENANCE

It is recommended the pump and pit are serviced every three months in industrial/commercial applications or 12 months in standard applications.
